OCTM's Professional
Development Cadre
**Math Workshops
2009-2010**

Strengthen your staff's understanding, implementation, and assessment of mathematics and the K-12 standards, enabling them to better help students more towards the Oregon Diploma. Workshops target effective instruction and include:

-  **Oregon Math Standards:** Delve into Oregon's K-12 math standards to realize the importance of every teacher's role in preparing all students for the Oregon Diploma.
-  **H.O.T. Mathematics:** Learn to recognize and adapt the cognitive demand of math tasks for **H**igher **O**rder **T**hinking.
-  **Are You Asking the Right Questions?** Engage students and drive their thinking from fragile conceptualization to solid understanding with good math questions and questioning strategies.
-  **Lesson Leverage:** Lift students' engagement and achievement with tools for anticipating student responses, sequencing student sharing, and connecting student work to math content.
-  **Assessment's Big Ideas:** Explore the purposes of different forms of assessment, including examining samples of student work.
-  **Assessment FOR Learning:** Learn to use student work, formative assessment and data to guide instruction and identify misconceptions.
-  **Work Samples and Scoring:** Learn the ins and outs of the Oregon state scoring guide to score student work samples for the Oregon Diploma.
