

Name: _____

Math Station Contract: Sort and Classify (1st)

Activity	Date	Points Earned	What I Learned
1. Pattern Blocks Students arrange pattern blocks on a matrix so that no row or column contains two of the same shapes. They record their results on grid paper using pattern block stamps.			
2. Buttons Students sort buttons using a variety of rules and record their on a venn diagram.			
3. Teddy Bears Students use yarn circles to sort bears a variety of ways and create a pictograph using bear stamps.			
4. 4 in a Row Students try to be the first person to lay 4 tiles in a row either horizontally, vertically or diagonally on a sheet of graph paper.			
5. Attribute Blocks Students create 1 difference trains using attribute blocks			
6. Junk Students sort junk on sorting mats and then create charts to record their thinking.			
7. Bugs Students sort bugs by a variety of categories and record the number in each category on a bar graph.			
8. Wooden Cubes Students place 2 or 3 blocks on a grid sheet trying to be the last person to place down the last block. They may only place blocks where the blocks share adjacent faces.			
9. Odd Number Wins Students count out 15 bingo chips. They take turns picking up either one, two, or three chips. When all the chips have been picked up they count to see who has an odd number of counters. That person is the winner.			
10. Transportation Toys Students sort a variety of miniature transportation models and record their rule and data using a tally chart.
