

**Hypothesis:**

We think the bottom of our leg's is longer  
than the top part.

**Plan:**

Lay down, use chalk to mark  
top of the leg to the knee. Then  
we marked knee to heel. then we  
moved and used the meter stick to  
measure on the data sheet.

**Results:**

we found out our hypothesis was  
correct. Every kid's leg was longer  
on the bottom than the  
top
